RE: Incomplete Notice

Dear Mr. Rachele:

The Notice to conduct exploration activity in the vicinity of T16S R13E Sec. 33 and T17S R13E Sec 04 was received on September 20, 2012. The Notice has been assigned Bureau of Land Management (BLM) case file number UTU-89340. Please refer to this number in future correspondence concerning this operation.

Consistent with the surface management regulations at 43 CFR 3809.311(a), the BLM has reviewed the Notice to determine if it meets the content requirements at 43 CFR 3809.301(b). Based on our review, the following information is requested from you in order for the Notice to be complete:

1. There is no map that shows access routes or roads that will be used during exploration. A map showing the project location, claims, access routes and roads is required.
2. An appropriate seed mix needs to be included in the reclamation portion of the Notice.
3. The Notice mentions the possibility of drilling exploration holes but does not explain how the drill holes will be plugged.

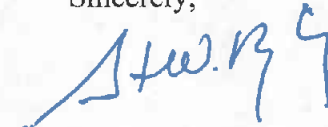

Until a complete Notice is filed with this office, the BLM is unable to determine that your proposed operations will not result in unnecessary or undue degradation as defined under 43 CFR 3809.5.

Please submit the required information at your earliest convenience. Until we receive this information your Notice cannot be processed and the proposed exploration activity is not to take

place. Conducting the proposed activities before filing an acceptable Notice as required by 43 CFR 3809.21 is a prohibited act under 43 CFR 3809.605(b).

If you would like additional information or wish to discuss this project further please contact Greg Gochmour (Geologist) at (435)-636-3639.

Sincerely,

*Acting for*   
Patricia A. Clabaugh  
Field Manager
